GRANOR PASSI FOOD SAFETY AND QUALITY POLICY

WE DRINK OUR JUICE!

QUALITY = SATISFIED CUSTOMERS

Granor Passi is committed to the manufacturing of safe fruit products for the local and international markets. Granor Passi's Management implemented a Food Safety and Quality Management System that complies with the requirements of FSSC 22000:2018 and ISO 9001:2015, and forms part of the integrated Granor Passi Food Safety and Quality Management System (FSQMS).

To ensure that our Food Safety and Quality Management System is aligned with our strategy, whilst taking account of relevant internal and external factors, we initially collated and analysed pertinent information to determine the potential impact on our context and subsequent business strategy. Such issues include factors that are capable of being affected by, or capable of affecting our company and are defined under Internal and External issues. These provide the framework for food safety and quality objectives and ensure every department plays its role in ensuring safe and quality products. Our food safety and quality performance will be considered regularly at meetings and this policy and food safety and quality objectives will be reviewed annually during the Management Review Meetings to ensure that it reflect the aims and aspirations of the company for suitability and continuous improvement.

Granor Passi complies with applicable local and international statutory and regulatory requirements as well as customer requirements.

Each employee is encouraged to identify improvements that will ensure the continued suitability and effectiveness of the Food Safety and Quality Management System to the benefit of our valued customers and interested parties. The Food Safety and Quality Policy is available to interested parties.

Our communication systems ensure that we effectively communicate regarding food safety and quality both internally and externally. This Food Safety and Quality Policy is communicated to all employees via induction and departmental training. Employees are trained to be competent in preparing food in accordance with our food safety and quality procedures.

All Granor Passi operations are committed to continuous improvement, which is measured, evaluated and validated through internal and external audits

As Chief Executive Officer, I am committed to our Food Safety and Quality Policy, which is owned and endorsed by the Board of Directors. That said, every Granor Passi employee at every level and every function in the company is responsible for successful implementation of this policy and related procedures.
